Book 5:
Account book of Robert Townsend & Co.; Part A: May 18, 1781 to May 19, 1782; Part B: May 19, 1782 to August 1, 1783.

1. Introduction:

There are two sections to this ledger, Parts A& B, which list all purchases for Robert Townsend's store.

Part A covers purchases from May 18, 1781 to May 19, 1782 while Part B lists all purchases from May 19, 1782 to August 1, 1783.Items purchased for sale included food, kitchenware and wood. Charges for personal services are also listed. As you read through the journal, you will see a number of word abbreviations such as Jan^{y}for January, W^{m}for William and D^{o} for ditto. Appendix II contains a number of abbreviations which will be helpful in understanding the individual entries.

Robert Townsend owned and successfully operated a general store in New York City when New York was occupied by British forces during the American Revolution. Townsend gained a background in merchandising by being apprenticed during his teenage years at the Templeton & Stewart Company, also in New York. He managed to sell farm produce imported from Long Island farms and purchased other goods from companies active in importing goods. Appendix I will list these products and the journal pages will show product costs.

As you read through the House Expense ledger pages, cost figures are shown using British denominations, £ (pounds), s (shillings) and d (pence). In the headings for each ledger page the £, s and d columns are listed twice. The first three column set is for the product cost data and the second set is the sum of all entries since the previous summation. For example:

1781			£	s	d	£	s	d
		Amount brought forward				£11	10	7
June	30	Paid for Milk since the 28thins^{t}[instant]			3½			
		D^{o} for Fish Salled [sic] &parsly [sic]		2	8			
		D^{o} for Salt			3½			
		D^{o} for Buscuit [sic]		1	0		4	3

The first entry, "Amount brought forward" is the sum of expenses from the previous page will be added to the new page entries. The entries for June 30th "Paid for Milk since the 28thIns^{t}"means the milk is paid since purchased the 28th of this month at a cost of 3½ pence, Ditto for fish, salled [salad] &parsly [parsley] for 2 shillings and 8 pence, Ditto for Salt at 3½ pence and Ditto for Buscuit [Biscuit] at 1 shilling and 0 pence. The 4 shillings and 3 pence is the sum of the June 30th entries.

To help understand the values of the British entries in New York money, the pound is worth approximately to 2.50 Spanish dollars, a shilling is valued at roughly 12.5 cents and the pence at 1.042 cents. Therefore the line entry of "Amount brought forward" in the above ledger is £11 (11 pounds), 10 s (10 shillings) and 7d (7 pence) is (11 x 2.50 + 10 x .125 + 7 x .01042) or roughly 28.82 dollars.

The Spanish dollar was the standard for domestic and international trade. It was accepted worldwide as a legal currency due to its consistency of weight and silver content. You will also notice that many

entries show ½ cent coin amounts. One–half cent British coins were accepted in change as were two British farthings. Four farthings was equivalent to 1 British penny or pence.

Foreign coins circulated in all the British American colonies and were valued in British denominations. A merchant would receive Spanish, English, French, Portuguese, Dutch and many other foreign coins in the course of trade. These coins circulated as legal tenderand on 1857 all foreign coins were no longer considered legal tender. Appendix III will list various foreign silver and copper coins that circulated in the British colonies.

2. Journal accounts:

Part A: May 18, 1781 to May 19, 1782 (pages 218-246 in this doc):
